With icon

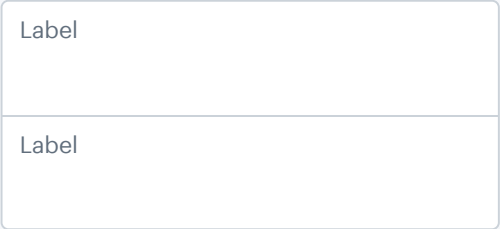

A horizontal form element on a light gray background. It consists of a small square icon on the left containing a gray person silhouette, followed by a white rectangular input field. The entire form is enclosed in a thin gray border.

With icon with border

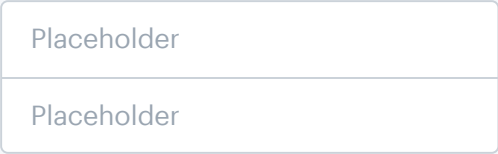

A horizontal form element on a light gray background. It features a square icon on the left with a gray background and a white person silhouette, followed by a white rectangular input field. The icon is visually emphasized by its solid color and the white icon.

Icon emphasized

A vertical form element on a light gray background. It contains two stacked white rectangular input fields. Each field has a gray border and a gray inset label 'Label' positioned at the top left of the field.

Connected inputs with inset labels

A vertical form element on a light gray background. It contains two stacked white rectangular input fields. Each field has a gray border and a gray placeholder text 'Placeholder' positioned at the top left of the field.

Connected inputs with placeholder only

# Input groups

Label

A small, rounded input field with a dark blue 'Sign up' button attached to its right side. The input field has a light gray border and rounded corners.

Small rounded / Attached

Label

A small, rounded input field with a dark blue 'Sign up' button detached from its right side. There is a small gap between the input field and the button. Both have light gray borders and rounded corners.

Small rounded / Detached

Label

A large, rounded input field with a dark blue 'Sign up' button inset into its right side. The button is slightly smaller than the input field's width and has rounded corners.

Large rounded / Inset button

Label

A large input field with a dark blue 'Sign up' button to its right. A thin horizontal line connects the bottom of the input field to the left side of the button. The input field has a light gray border, and the button has a dark blue background.

# Error validation

This diagram illustrates a form layout where the error message is positioned below the input field. The form consists of two input fields, each preceded by a 'Label'. The first input field has a dark gray error message box, 'Oops! An error as occurred.', placed directly beneath it. The second input field is empty. A 'Sign up' button is located at the bottom right of the form area.

Inline below input with solid background

This diagram illustrates a form layout where the error message is connected to the input field. The form consists of two input fields, each preceded by a 'Label'. The first input field has a dark gray error message box, 'Oops! An error as occurred.', which is visually connected to the input field by a thin line. The second input field is empty. A 'Sign up' button is located at the bottom right of the form area.

# Tables

A table with 4 columns and 9 rows. The first row is white, and the subsequent rows alternate between white and light gray, creating a zebra striping effect. Each cell contains a horizontal line representing text. The table is enclosed in a light gray border.

Zebra striping

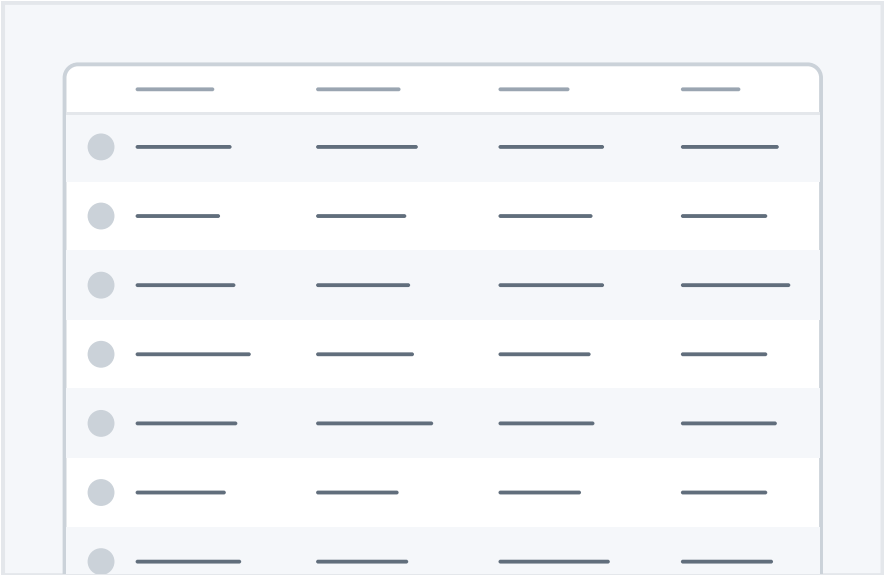

A table with 4 columns and 9 rows. Each cell is separated from the others by thin gray borders. Each cell contains a horizontal line representing text. The table is enclosed in a light gray border.

With borders

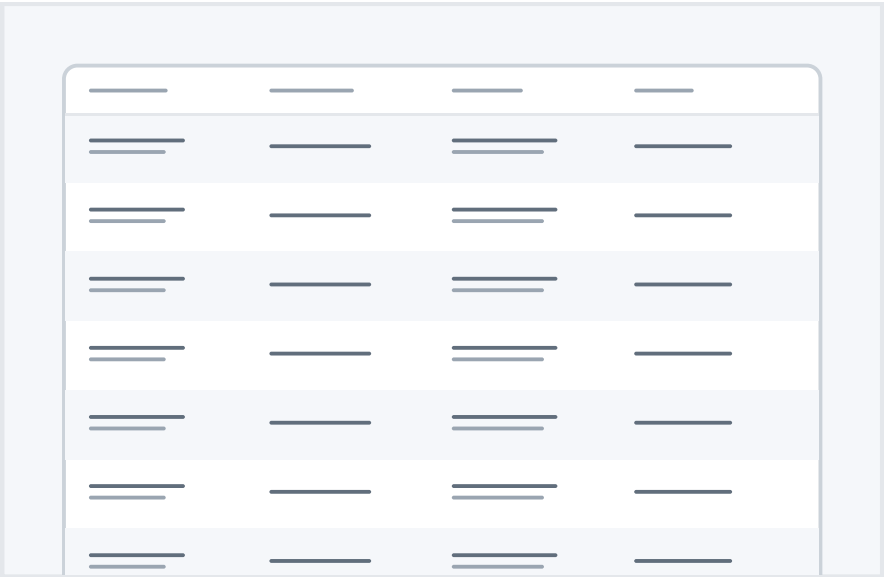

A diagram of a condensed table layout. It features a light gray background with a white table area. The table has 4 columns and 12 rows. Each row contains four horizontal bars of varying lengths, representing text content. The rows are grouped into six pairs, with alternating light gray and white background colors for each pair.

Condensed

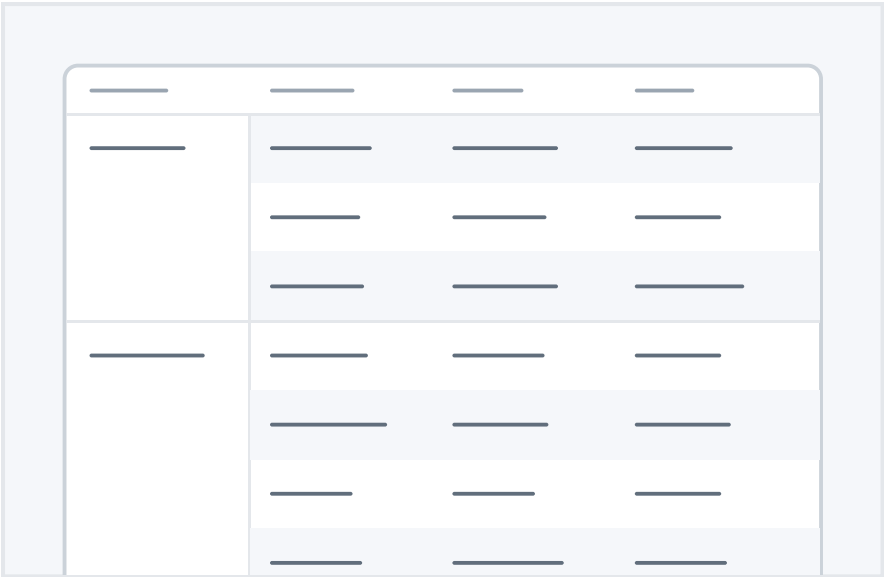

A diagram of a table layout with images. It features a light gray background with a white table area. The table has 4 columns and 10 rows. Each row contains a small gray circle (representing an image) followed by three horizontal bars of varying lengths. The rows are grouped into five pairs, with alternating light gray and white background colors for each pair.

With images

A diagram of a table layout with multi-row supporting content. It features a light gray background with a white table area. The table has 4 columns and 8 rows. Each row contains four horizontal bars of varying lengths. The first two columns of each row contain multiple lines of text, while the last two columns contain single lines of text. The rows are grouped into four pairs, with alternating light gray and white background colors for each pair.

Multi-row for supporting content

A diagram of a table layout with a grouping column. It features a light gray background with a white table area. The table has 4 columns and 8 rows. The first column is a grouping column containing two large gray rectangles. The remaining three columns contain horizontal bars of varying lengths. The rows are grouped into four pairs, with alternating light gray and white background colors for each pair.

# Multi-section forms

A wireframe of a multi-section form. It features two main sections, each with a label and a description on the left, and a series of input fields on the right. The first section has a label, a description, and two input fields. The second section has a label, a description, and three input fields. The layout is clean and organized, with clear visual separation between sections.

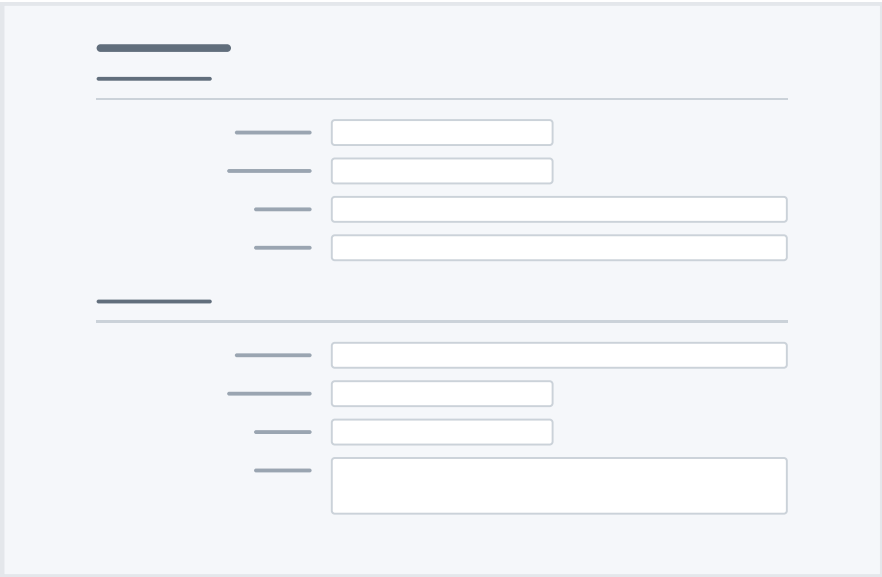

Two-column with label and description for sections

A wireframe of a multi-section form. It features a single column of input fields. The form is divided into sections by horizontal lines. Each section has a label and a description on the left, and a series of input fields on the right. The layout is clean and organized, with clear visual separation between sections.
